

Distributed Functions

9th Vector Congress 2018

Introduction

Automated Driving

Connectivity (IoT)

Electrification

2025:
More than **400 Mio.**
connected vehicles
on the road

Focus Connectivity – Business Models

Usage-based insurance

Vehicle-to-Everything communication

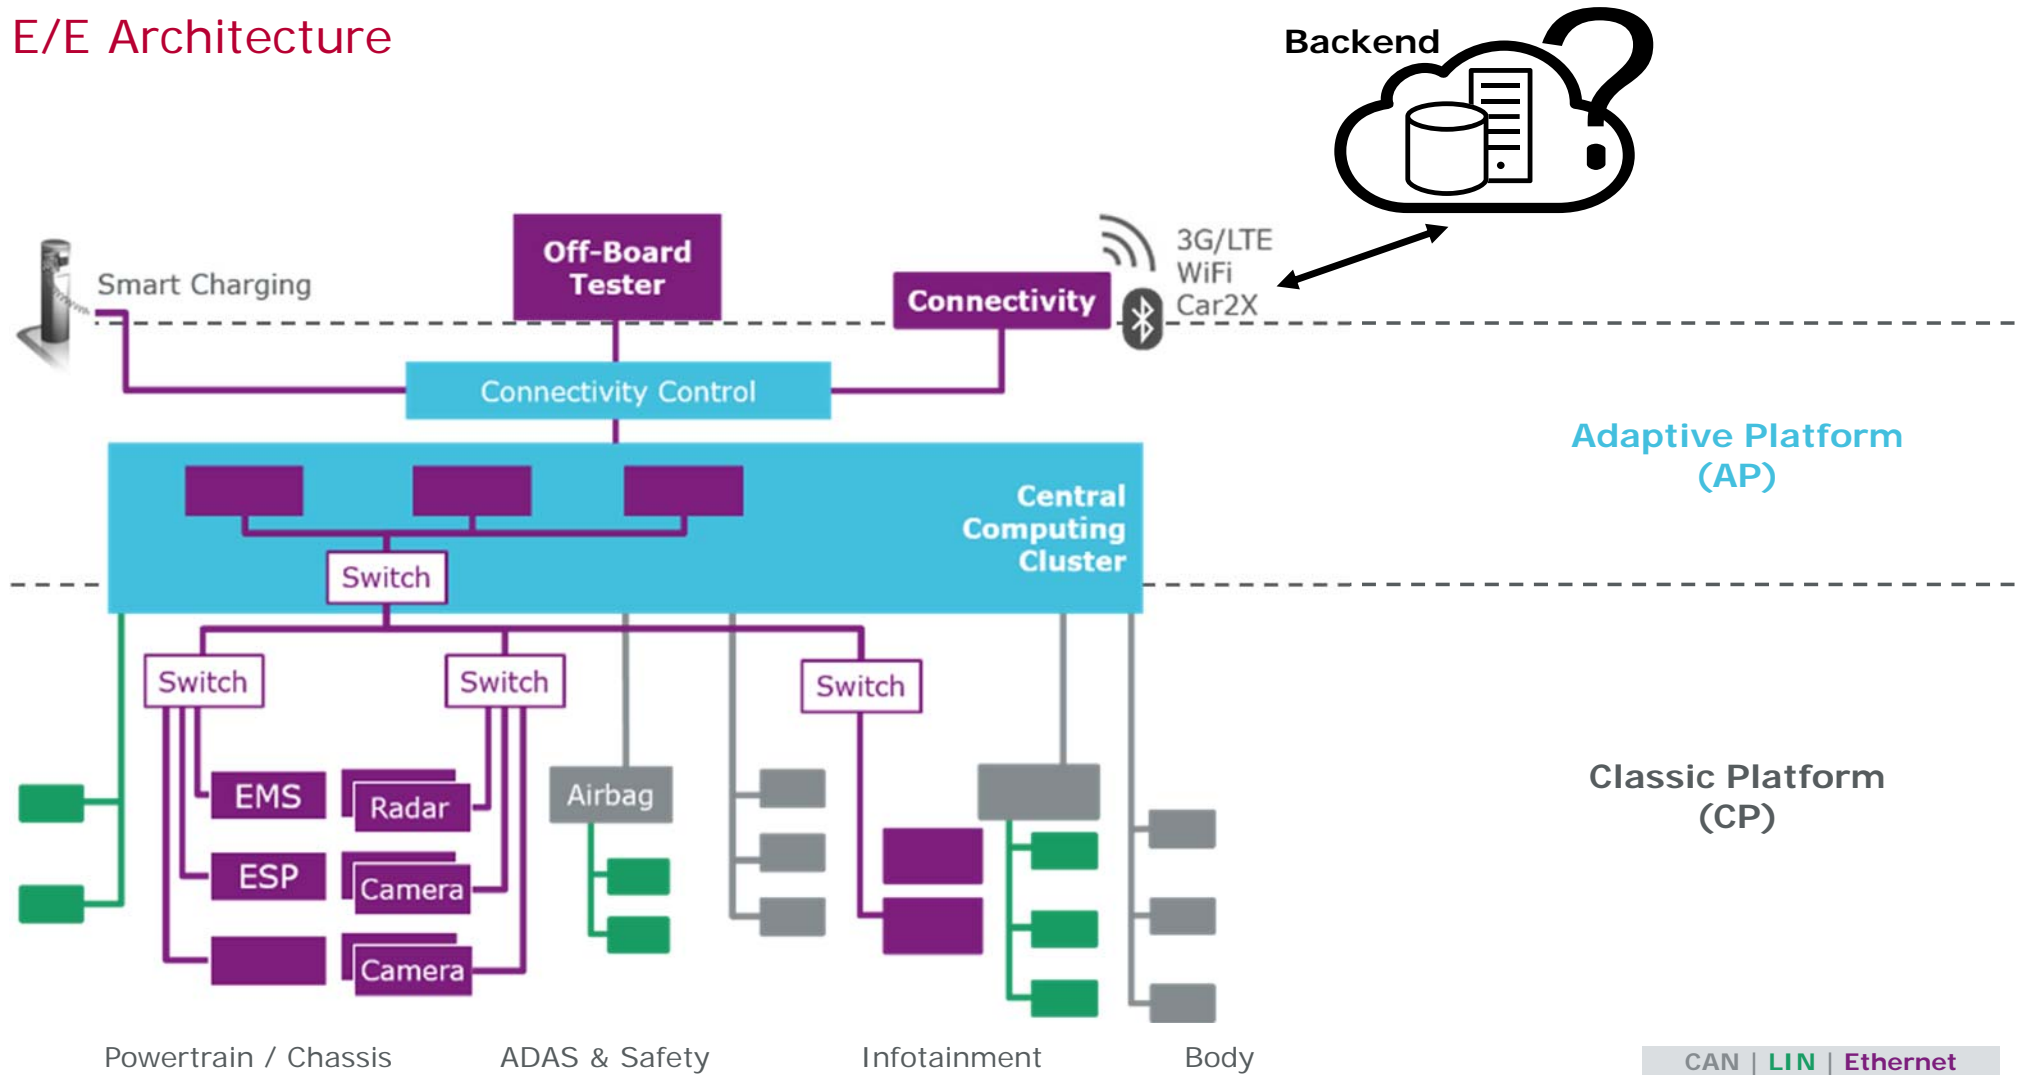

Smart Home and business model integration

Autopilots and Self-driving cars

Source: Statista, "Connected car", Market report, March 2017

Focus Connectivity – Use cases

Infotainment

Apps:

- ▶ Advanced Navigation
- ▶ Streaming
- ▶ Weather
- ▶ ...

OTA - Infrastructure

Apps:

- ▶ Software Download
- ▶ Live Diagnostics
- ▶ Remote Diagnostics
- ▶ Data Collection

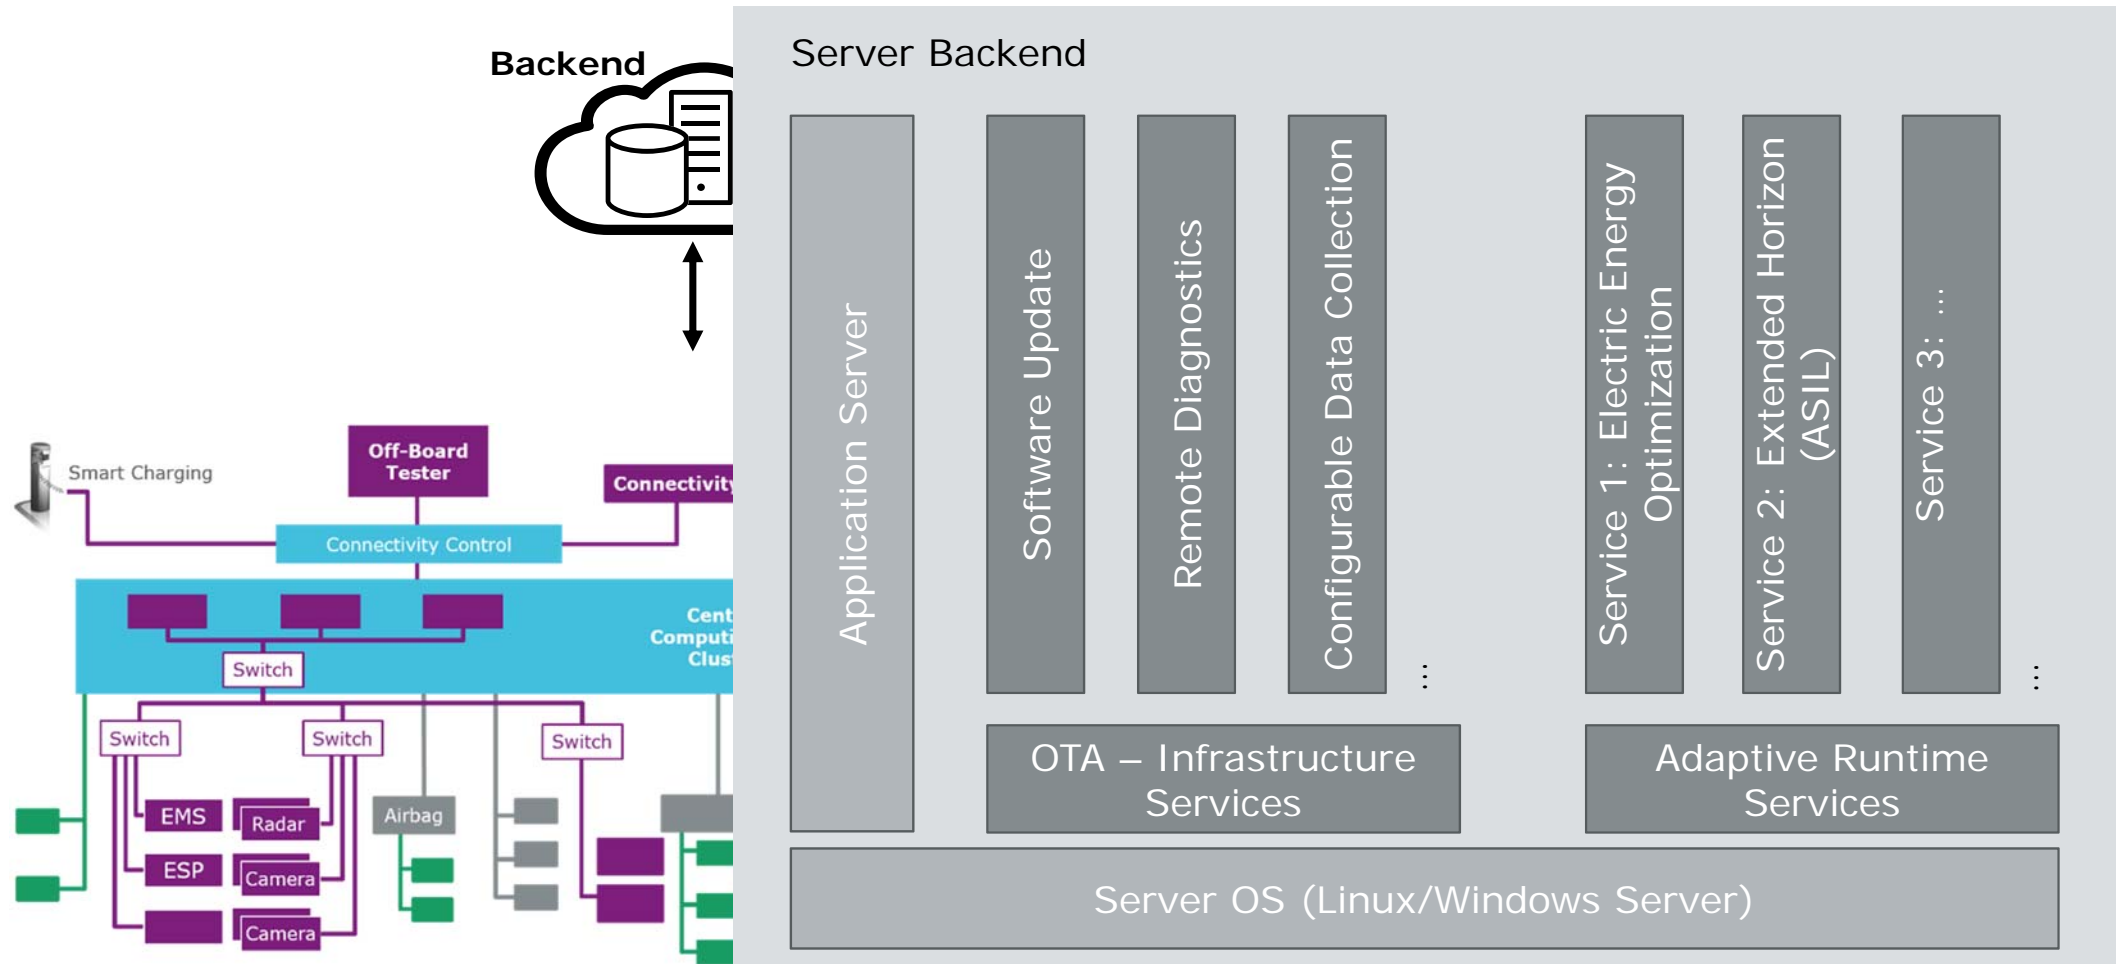

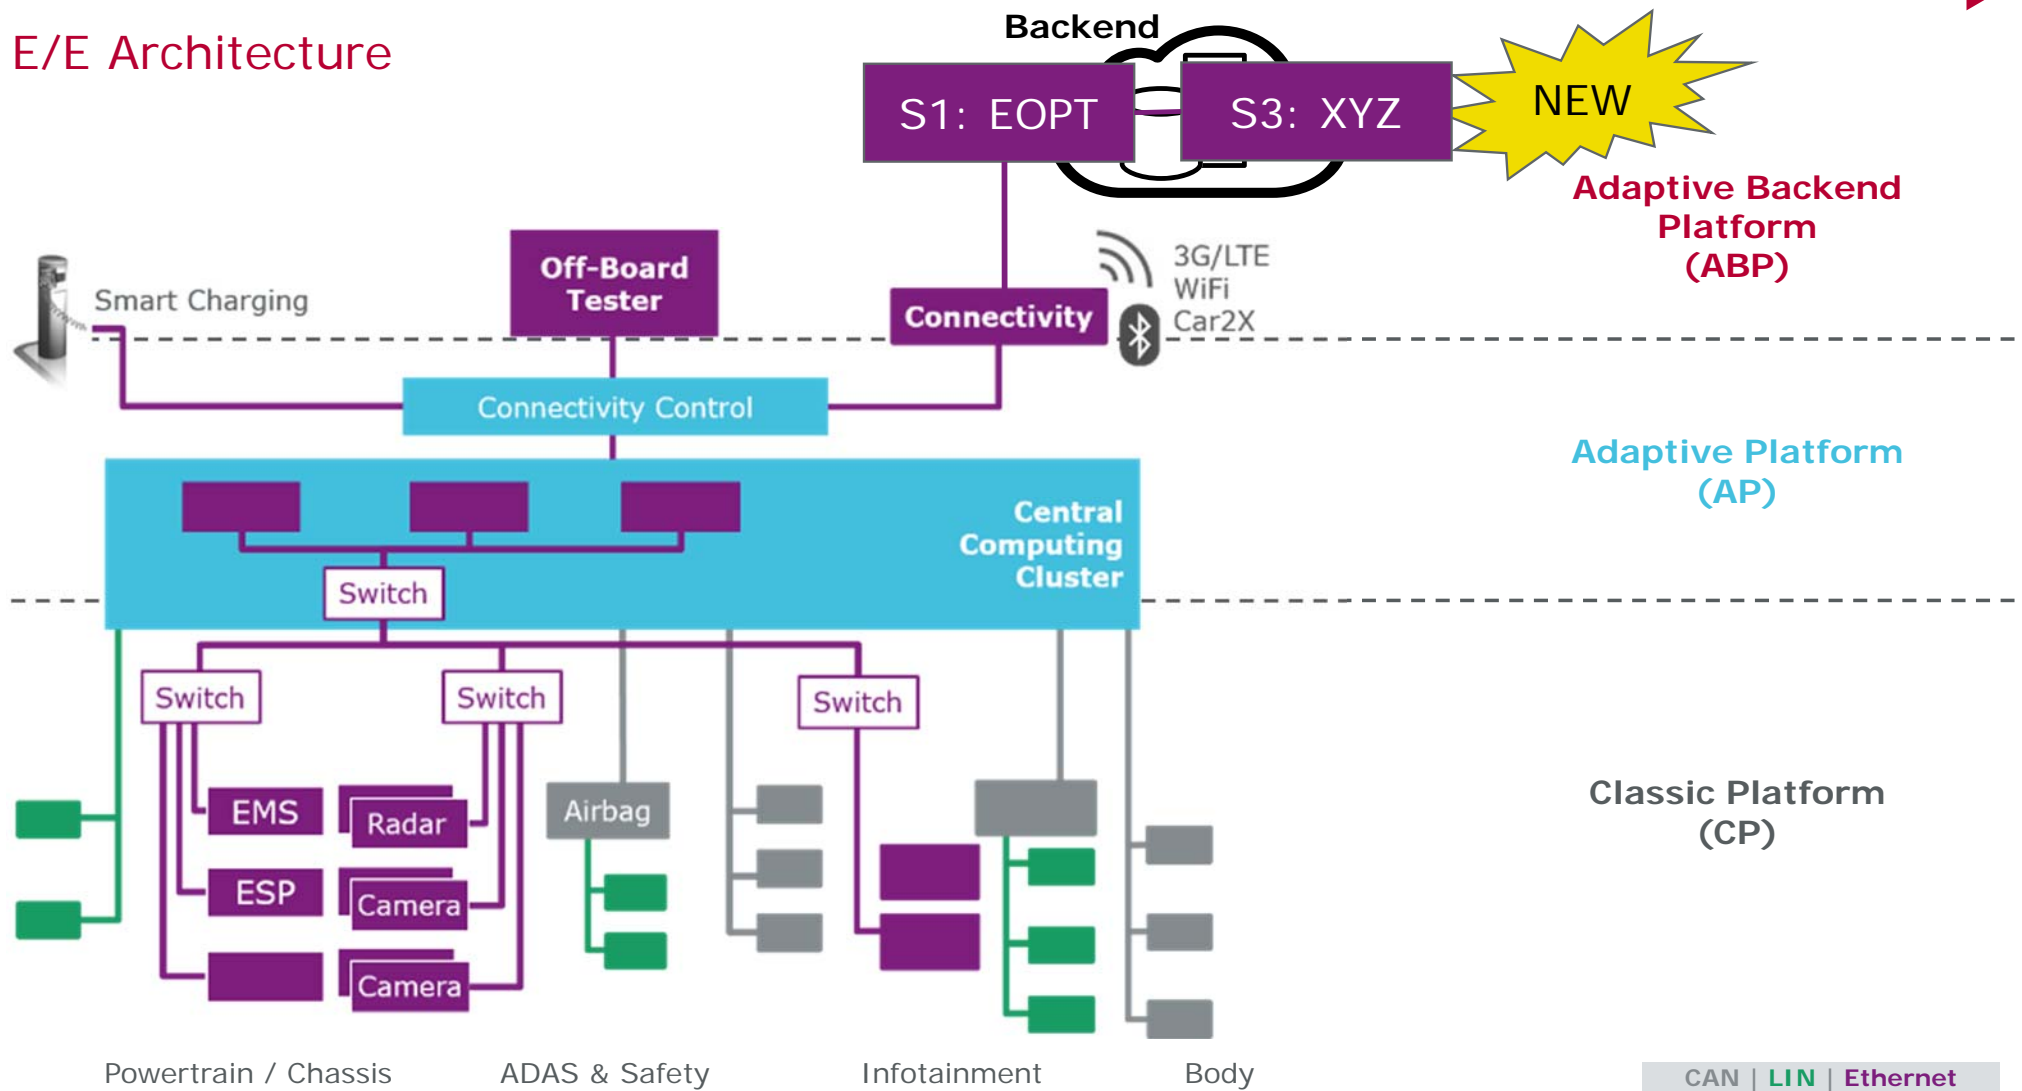

Distributed Functions

- ▶ Functions calculated in the Backend
- ▶ ASIL Level A+
- ▶ ...

E/E Architecture

Conclusion

- ▶ OTA in today's meaning offers infrastructure services for the operation of a car
- ▶ With functions calculated on the backend a variety of today's unthought business cases become possible

- ▶ Needed
 - ▶ Reliable and safe platform in order to deploy and run those functions
 - ▶ Transparent architecture between inside car and backend
 - ▶ Tooling
 - ▶ Integration of "Productive IT" in E/E Development Centers
